Problem Statement

Design an app that allows college students to connect with other college student in order to find transportation on campus and around campus.

Who is experiencing the problem?

College students who need rides

What is the problem?

Price of Ubers/Lyfts and the number of Ubers/Lytfs in the area. Another problem it helps with is there is no easy way for student to meet each other unless they are in the same building, class or club.

What does the problem present itself?

Every colleges student's normal day life

Why does it matter?

College students don't want to spend money and it will help create a better community in the college.
